

An area rich in biodiversity

The Andasibe National Park, a biodiversity gem in the heart of Madagascar, stands as a must-visit destination for nature lovers and wildlife enthusiasts. Located just 140 kilometers from the bustling capital, Antananarivo, this green paradise serves as an authentic sanctuary for flora and fauna, **divided into two extraordinary protected areas: the vast Mantadia National Park and the Analamazaotra Special Reserve, also known as Périnet.**

Mantadia National Park

Mantadia National Park, sprawling across 15,500 hectares, is distinguished primarily by the presence of lush primary forests. This biodiverse haven serves as a crucial refuge for numerous animal and plant species, their lives intertwined in perfect harmony. Dedicated conservation efforts manifest through numerous scientific observations to ensure the survival of these unique species.

During an exploration of this primary forest, adventurers may encounter the fascinating Indri Indri, the largest lemurs in Madagascar, growing up to a meter in height. These captivating primates dominate the landscape with their majestic appearance and acrobatic displays among ancient trees. However, the Indri Indri is not the only lemur calling Mantadia home. A dozen other species, including the Aye-Aye, Varika mavo or Eulemur fulvus, and the Avahi, enrich the diversity of the park's fauna.

Not only lemurs but also an extraordinary variety of reptiles and amphibians populate this vast natural area. Over 50 species of reptiles and as many amphibians, with their unique shapes and surprising colors, contribute to creating a unique ecological balance within Mantadia National Park.

A hidden treasure within this park is the presence of *Urania madagascariensis*, one of the rarest and most beautiful butterflies globally. This precious specimen, with its multicolored wings and graceful flight, is a jewel in Madagascar's biodiversity.

Rich Flora and Fauna

The experience in Andasibe National Park extends beyond extraordinary fauna to its lush flora. Ancient trees, exotic plants, and wild orchids create an enchanting backdrop, adding a touch of magic to the adventure in the primary forest.
